

**FOR IMMEDIATE RELEASE**

March 11, 2015

**ECOSENSE® HONORED WITH TWO PRESTIGIOUS  
LIGHTING DESIGN AWARDS AT HOME AND ABROAD**

Honored with RIBA Stirling Prize and two Product Innovation Awards

**Los Angeles, CA, March 11, 2015** — EcoSense, a fast-growing manufacturer of high-performance LED lighting technologies, announced today that it was recognized in two prestigious competitions, the RIBA Stirling Prize for the Best New Building of the Year and two 2014 Product Innovation Awards (PIA) from Architectural Products Magazine.

EcoSpec® Linear HP EXT Wall Wash luminaires from EcoSense illuminate the exterior of the RIBA award-winning, Everyman Theatre, in Liverpool, England. The original Everyman Theatre opened in 1964 but recently underwent a complete renovation to create an entirely new and sustainable building. The lighting design team was tasked with ensuring that the soul of the old Everyman Theatre remained intact while utilizing modern and sustainable materials. To achieve this desired result, the team chose the EcoSpec Linear HP EXT Wall Wash luminaires for their unparalleled flexibility and energy-saving footprint.

Regarding the project, judges for the RIBA Stirling Prize said: “It is truly a ground-breaking public building, achieved through a clever team – client, architect, consultants and contractors – where the new truly celebrates the past.”

EcoSense also recently received two Product Innovation Awards (PIA) from Architectural Products Magazine, a leading source for trending products. The EcoSpec® Linear Dimming Control Module (LDCM) and the Slim Cove INT were both recognized in the Interior Lighting category for their unique design. The LDCM-PL takes a 0-10V dimming signal and a fixed line voltage input and converts it to an ELV dimmed output for the smoothest, flicker-free dimming. The Plenum Rating allows for easier installation, and meets local building codes for a wider array of spaces and project types. Slim Cove INT is the smallest and most versatile cove lighting on the market, with a diameter smaller than a nickel.

“Building on the success of last year’s program, our award proves commercial building manufacturers are committed to, and are working arduously toward, delivering more sustainable products, as well as products that deliver better performance, life and affordability,” commented Jim Crockett, Editorial Director of Architectural Products Magazine.

“We are thrilled to be recognized and appreciated by lighting designers, both in the US and abroad,” said [Mark Reynoso, CEO of EcoSense](#). “EcoSense is committed to developing new products that meet the unique demands of lighting designers everywhere.”

### **About EcoSense**

Founded by a team of long-serving industry experts with proven know-how in the development and best practices of solid-state illumination, EcoSense provides best-in-class LED lighting solutions for use in commercial and architectural applications. The company offers a comprehensive line of high-performance LED fixtures that meet the technical requirements of the most demanding projects while delivering substantial benefits over traditional lighting sources. EcoSense was established in 2008, is privately held and has received numerous accolades including two LUX Awards, three Product Innovation Awards (PIA), a Next Generation Lighting (NGL) Award and an Infiniti Award.

### **About RIBA Stirling Award**

The Royal Institute of British Architects (RIBA) champions better buildings, communities and the environment through architecture and its members. The RIBA Stirling Prize is the UK’s most prestigious architecture award. It is given to the architect of the building thought to be the most significant of the year for the evolution of architecture and the built environment. The RIBA Stirling Prize is judged on a range of criteria including design vision, innovation and originality, capacity to stimulate engage and delight occupants and visitors, accessibility and sustainability, how fit the building is for its purpose and the level of client satisfaction.
